

Explore: How far is 2 metres?

All children should understand how far 2 metres is, now (Covid-19 social distancing guidance) this is more important than ever.

Measurements in real life start by using the standardisation of familiar items. Anything which is the same size e.g. toy blocks, paperclips, Lego, toy cars, toilet rolls!

Use some familiar objects from you home to explore how far 2 metres is with your child.

Extend thinking further by looking at conversions: feet, inches or how many lengths of your child—is it $1\frac{1}{2}$, $1\frac{1}{4}$?
